## EDUCATION:

### Master of Engineering in Telecommunications

INSA Lyon (National Institute of  
Applied Sciences), France  
Graduated Sep 2025

### Exchange – Master of Computer Science

PUC-Rio (Pontifical Catholic  
University of Rio de Janeiro),  
Brazil  
Sep 2024 – Mar 2025

## ACHIEVEMENTS:

Norway U16 Rugby Team  
ANSSI Cybersecurity MOOC  
SPIE Hackathon – 1st Place  
Aeronautics Initiation Certificate  
Linguaskill Certification  
Paper presented at APVP 2024

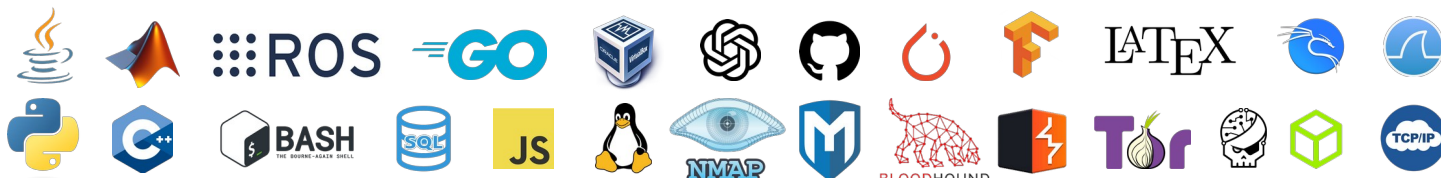

## CERTS & CTFs:

Root-Me (2,000+ points)  
Cisco Certified Ethical Hacker  
BELLATRIX 2026 – Top 100  
MetaCTF Flash CTF (Jan 2026)  
Hack-A-Sat · CSCG 2025  
Cyber Game 2024 & 2025  
NullVastation 2025 (6/6)  
Cyshock – The Awakening 2025  
[Write-ups on GitHub](#)

## LANGUAGES:

English (Fluent)  
French (Native)  
Portuguese, Japanese, LSF  
(Beginner)

## SKILLS:

## PROFILE:

INSA Lyon engineer (Telecommunications – Cybersecurity & Networks, 2025), now a Junior Offensive Security Consultant at Akvize. I combine client delivery (audits, pentesting, OSINT), internal R&D tooling and continuous hands-on practice through CTFs.

## EXPERIENCE:

### Junior Consultant – Offensive Cybersecurity

Oct 2025 – Present

Akvize, Paris – France

- Deliver security, IT and architecture assessments for clients across various industries (governance, cloud/on-prem, network exposure, application security).
- Perform black-box web penetration tests on client assets.
- Conduct OSINT investigations and cyber due diligence; support digital forensics and incident remediation.
- Develop internal R&D tooling (Python/Go), including a 360° audit tool, to automate data collection, exposure analysis and reporting.

### Final-Year Internship – Offensive Cybersecurity

Mar 2025 – Sep 2025

Akvize, Paris – France

- Designed a commercial 360° cyber audit solution (applications, cloud, systems, networks) in Python/Go, automating key steps of the pentesting process, complemented by manual analysis.
- **Key skills:** Nmap, Nessus, Metasploit, Kali Linux, BloodHound, PingCastle, Mimikatz, Burp Suite, Nuclei, CVE, SIEM, firewall, WAF, IDS/IPS.

### Research Assistant

Sep 2024 – Dec 2024

CETUC Lab (PUC-Rio), Rio de Janeiro – Brazil

- Project: "Spoofing attacks on MIMO systems in robotic networks" – simulated their effectiveness against the MIMO communications of a robot fleet.
- **Key skills:** ROS, MATLAB, Python, spoofing attacks, MIMO.

### Research Assistant Internship

Jul 2023 – Jul 2024

CNRS – LIRIS Laboratory, DRIM Team, Lyon – France

- Project: "Privacy-preserving decentralized learning" – analyzed the effectiveness of privacy attacks against decentralized learning with dynamic topologies. **Published paper:** *Scrutinizing the Vulnerability of Decentralized Learning to Membership Inference Attacks*
- **Key skills:** Distributed systems, GPU, PyTorch, TensorFlow, gradient inversion, membership inference attacks (MIA).

### Technical Internship

Feb 2019 – Mar 2019

XMCO, Paris – France

- Immersion in a cybersecurity consulting firm; practiced penetration testing in a sandbox environment.
- **Key skills:** SQL injection, broken authentication & session management, XSS, LFI, unrestricted file upload, fuzzing.
